

- The New Zealand Major Trauma Registry (NZ-MTR) is a valuable source of data about major trauma patients in New Zealand. Access to the data, and requests for data from the NZ-MTR database are subject to strict access guidelines (see Data Use Policy for The New Zealand Major Trauma Registry).
- Conditional to the provision of data from the NZ-MTR, the NZ-MTR must be acknowledged as the source of the data. The recommended reference is:

“We wish to thank The New Zealand Major Trauma Registry (NZ-MTR) group, which is sponsored by the Accident Compensation Corporation and the Ministry of Health, for the provision of NZ-MTR data.”

- Where the interpretation of NZ-MTR data is central to the data request, it is expected that at least one member of the NZ-MTR team is named as a co-author on any publication arising from use of data from this project. The actual NZ-MTR contributor/s to be named will depend on the contribution to the particular data exercise.
- The capture rate applicable to the period/s of NZ-MTR data provided must be quoted with any published data. This information will be provided to you with your completed data request.
- It would be appreciated if you could provide (via the email address below) the NZ-MTR group with a copy of any document or presentation in which you quote these figures. A record is maintained of all requests for NZ-MTR data and its subsequent use as a means of monitoring its use by those interested in trauma data.
- I agree to acknowledge The New Zealand Major Trauma Registry for the provision of data for reports, presentations, publications and documents as appropriate.
